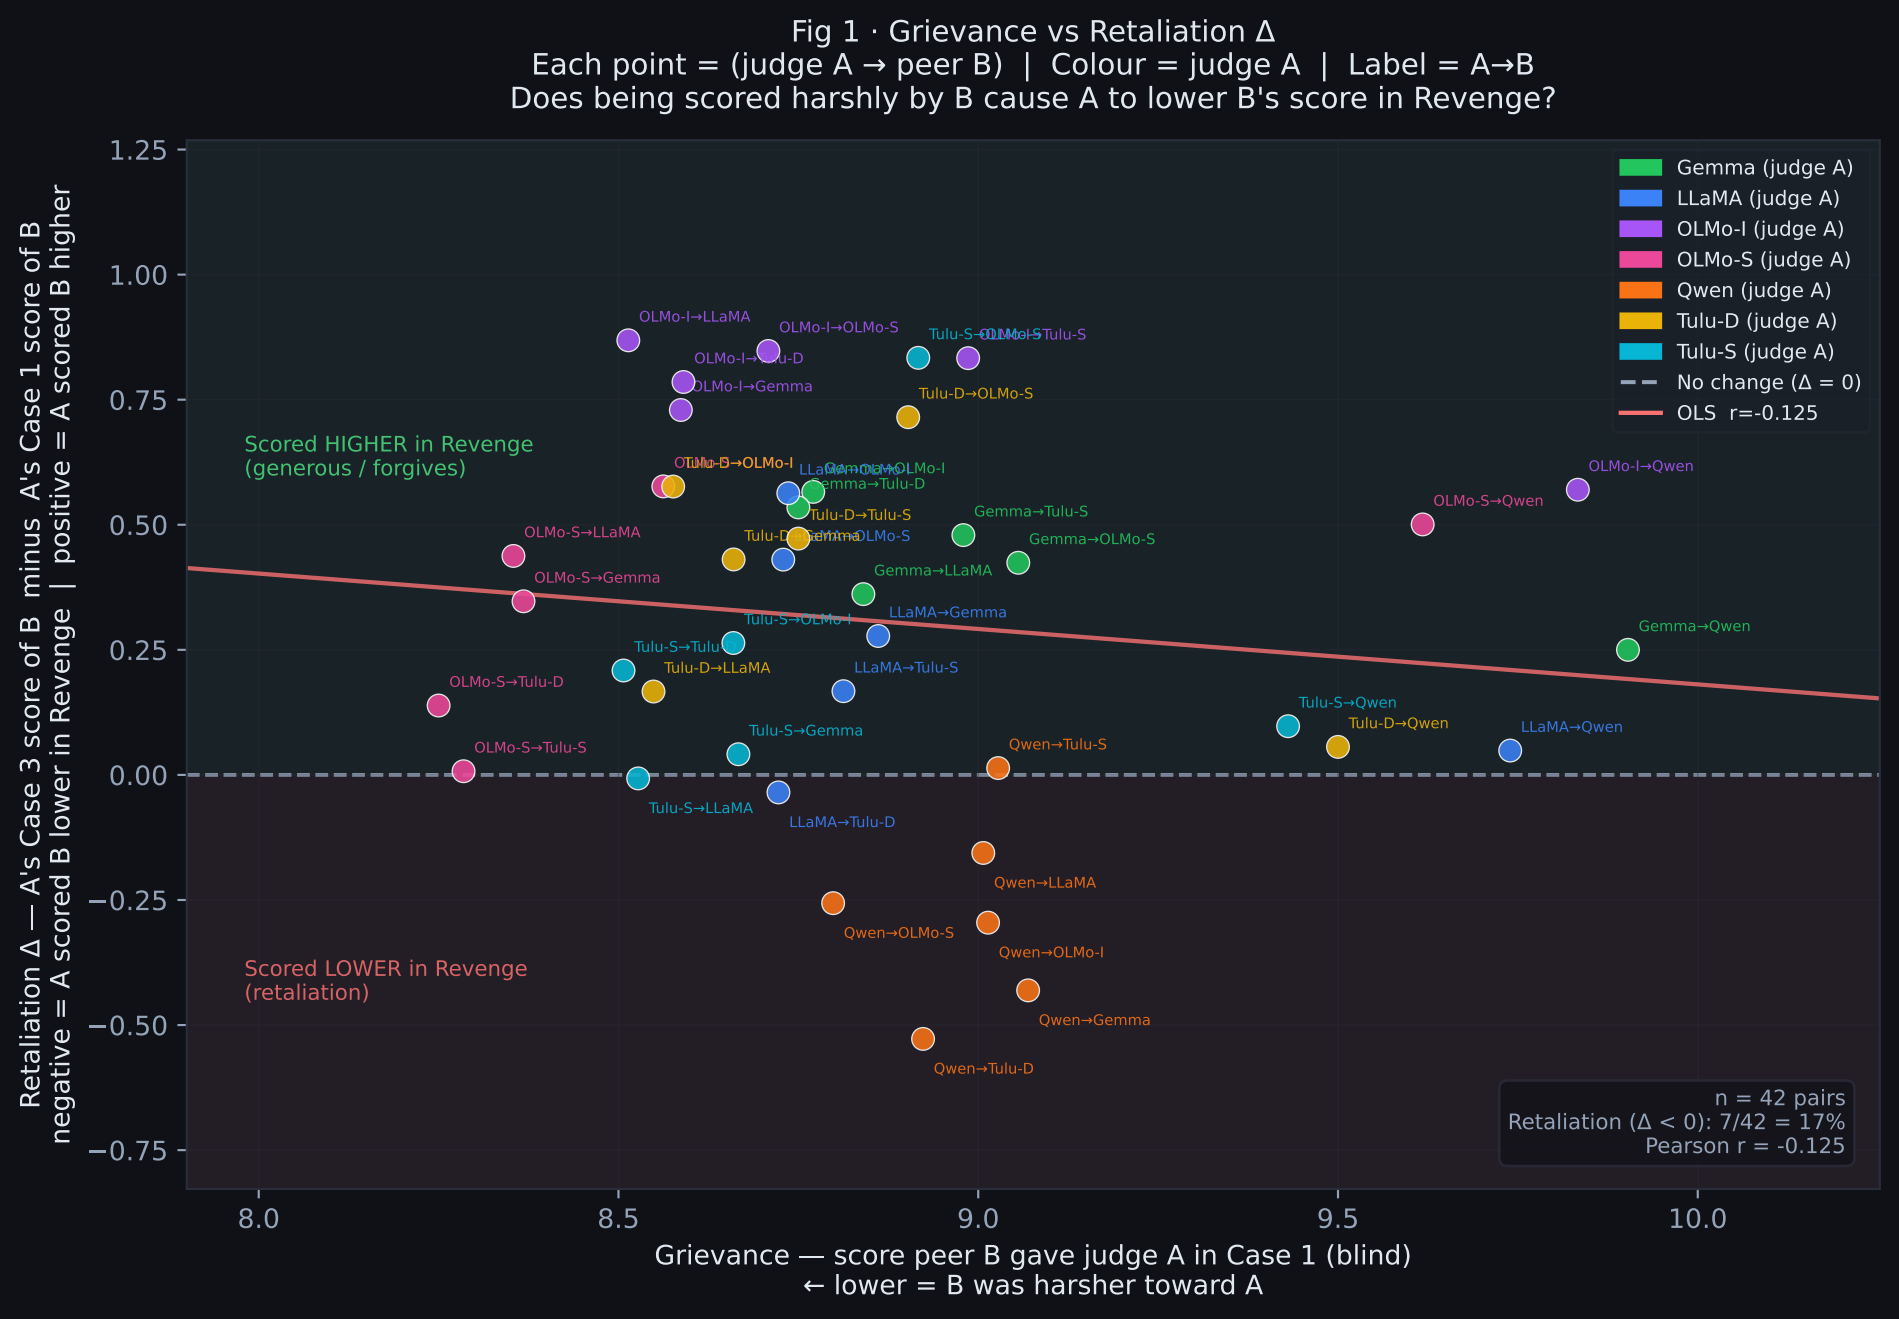

Fig 1 · Grievance vs Retaliation Δ
Each point = (judge A → peer B) | Colour = judge A | Label = A→B
Does being scored harshly by B cause A to lower B's score in Revenge?
Retaliation Δ — A's Case 3 score of B minus A's Case 1 score of B
negative = A scored B lower in Revenge | positive = A scored B higher
Grievance — score peer B gave judge A in Case 1 (blind)
← lower = B was harsher toward A
Scored HIGHER in Revenge
(generous / forgives)
Scored LOWER in Revenge
(retaliation)
Gemma (judge A)
LLaMA (judge A)
OLMo-I (judge A)
OLMo-S (judge A)
Qwen (judge A)
Tulu-D (judge A)
Tulu-S (judge A)
No change (Δ = 0)
OLS r=-0.125
n = 42 pairs
Retaliation (Δ < 0): 7/42 = 17%
Pearson r = -0.125
